PROFESSIONAL SUMMARY

Software engineer with 3 years of experience across professional roles and shipped projects, building Java springboot, .NET web applications and REST APIs on Microsoft Azure for an energy and utilities provider serving 5M+ customer accounts. Strong in .NET MVC, Web API, C#, React/TypeScript, SQL, Git, CI/CD, Azure and Agile/Scrum delivery. Experienced in designing system components, live production support and mentoring Junior Developers. Recently graduated in MEng in Computer Vision and AI (University of Limerick), quick to learn new platforms.

CORE SKILLS

Languages: C#, Java, TypeScript, JavaScript, SQL, Python
Backend: Springboot, Maven, .NET Framework, .NET Core, .NET MVC, ASP.NET Web API, REST APIs, Microservices, EF Core, SignalR
Cloud: Microsoft Azure, Azure Functions, Azure App Service, IAM, AWS Services
Frontend: React, Next.js, HTML5, CSS3
Databases: SQL Server, Azure SQL, PostgreSQL
DevOps & Monitoring: Git, Visual Studio, Azure DevOps, GitHub Actions, CI/CD, IIS, Docker, Kubernetes
Security & Testing: OAuth 2.0, JWT, RBAC, xUnit, unit, integration and regression testing

EDUCATION

MEng Computer vision and AI Sep 2024 to Jan 2026
University of Limerick | Grade: 3.2/4
Coursework: **Python, LLM optimization, ML, Model building, AI, CV classifications, Model Predictions, Model training, Edge device implementations**

B. E Electronics and Communication Engineering Aug 2018 to May 2022
St.Joseph's Institute of Technology | Grade: 8.48/10
Coursework: C, Java, DSA, Computer Networks

WORK EXPERIENCE

Software Engineer Aug 2022 to Aug 2024
Cognizant Technology Solutions| On site | Full Time
[California Energy and Gas Provider Client]

- Built and maintained internal web applications in **C#, .NET Framework, .NET MVC, ASP.NET Core, Entity Framework** and **SQL Server,** supporting a platform serving **5M+** customer accounts and **150K+** records daily.
- Built responsive **UIs** with **HTML5, CSS3, JavaScript**, **React and TypeScript,** building reusable components for billing, account management and service requests.
- Developed secure **RESTful Web APIs**, documenting **30+ endpoints** using **OpenAPI/Swagger** and implementing **JWT authentication, OAuth 2.0** and role based access control [**RBAC**].
- Improved application performance by **50%** through **SQL query optimisation,** database indexing and backend improvements, reducing report generation time from **45 seconds to under 8 seconds**.
- Contributed to solution design and modernisation across 5+ enterprise applications, supporting **legacy migration** from .NET Framework and VBA Access to .NET solutions.
- Deployed to Azure PaaS (**App Service**) and **IIS**, managing Azure DevOps CI/CD pipelines across development, staging and production by using **Git for source control.**

- Implemented unit, integration and regression testing using **xUnit**, increasing test coverage from 60% to 85% and reducing production defects by 35 percent.
- Resolved **complex production incidents** through debugging, monitoring and root cause analysis, contributing to a 30 percent reduction in mean time to resolution.
- Scoped and estimated work, delivering to agreed timelines in Agile/**Scrum** teams (sprint planning, stand ups) while mentoring interns.

Software Engineer Intern Feb 2022 to Jul 2022
Cognizant Technology Solutions| On site | Full Time

- Delivered 12+ bug fixes and 3 features in Java springboot on a live enterprise application, with 80% accepted at first code review.
- Wrote 100+ jUnit tests, lifting module coverage from 45% to 70%.
- Automated a release check task with a script, saving the team about 3 hours per week.

SWE & CLOUD PROJECTS

AI Moderated Real Time Chat Application Github - CodeBase **[2026]**
ASP.NET Core | React | TypeScript | PostgreSQL | SignalR | Azure

- Built a full stack real time chat application with a React/TypeScript front end, ASP.NET Core REST APIs and SignalR for live messaging.
- Integrated the OpenAI Moderation API to screen messages for harmful content before delivery, calling it from the ASP.NET Core back end and handling flagged messages server side.
- Deployed to Azure App Service with a CI/CD pipeline, reducing the release cycle to under 10 minutes.

VibeMap - https://vibemap.online/ [2026]
Next.js | TypeScript | AWS ECS Fargate | Docker | ECR | ALB | GitHub Actions | PostgreSQL

- Designed and deployed a production-style AWS architecture for a real-time web application using Docker, ECS Fargate, ECR, EC2, S3, IAM, Application Load Balancer and Route 53.
- Automated build and deployment workflows using GitHub Actions CI/CD, reducing manual deployment steps and enabling repeatable application releases.
- Load tested and monitored the application using Grafana/k6 analysing CPU utilisation, response times and infrastructure metrics to identify scalability bottlenecks.
- Built the application using Next.js, TypeScript and Supabase/PostgreSQL, implementing real-time location-based functionality and external API integrations.

CERTIFICATIONS

- Microsoft Azure -AZ 900, Microsoft. Issued Jul 2026 - (Credential)
- AWS Cloud Practitioner Essentials Learning Path— Amazon Web Services
- AWS Solutions Architect Associate Certification (SAA-C03) – Learning Path
